

SEPTEMBER 2016

California Energy Efficiency Coordinating Committee

Ad Hoc Business Plan Working Group Discussion

Thursday, September 8 from 1-4PM Pacific Time

Teleconference number: 212-727-4600 / passcode 0817894#

No webcast

California Energy Efficiency Coordinating Committee (CAEECC) will be having an *Ad Hoc* Working Group discussion this **Thursday from 1:00 to 4:00 PM** to discuss selected topics to be addressed in the Business Plans. The meeting is hosted by the Sheet Metal Works Union Local 104 in their offices at 1939 Market Street (at Guerrero Street) in San Francisco. Please see the [meeting webpage](#) for an updated agenda, more details on meeting logistics (including options on how to get there), and remote participation option details.

The purpose of this voluntary discussion session is to allow stakeholders to share their initial, more detailed perspectives on selected matters expected to be addressed in the PA Business Plans. The discussion topics have been expanded in response to CAEECC member feedback on the initial topic list circulated last week.

During this meeting, they will avoid reiterating previous CAEECC meeting conversations and stakeholder input, which are captured in the record. Also, they will avoid conversations about program design or future CA policy change opportunities.

No official CAEECC actions will be taken at this meeting, but meeting notes will be posted.

Please contact the CAEECC Facilitation Team by email at facilitator@caeec.org if you have questions about these matters or need assistance with the website.

To ensure you are receiving the most up-to-date CAEECC information, we highly recommend that you [sign up to join the CAEECC subcommittee email lists](#).

WHPA Resources

Visit the WHPA's [Regulatory Policy Activity and Resources](#) page for more information on California regulations and policies, and the WHPA [HVAC Research](#) page to review research on important HVAC topics.

Shea Dibble

WHPA Director, Regulatory Affairs and Policy

The Western HVAC Performance Alliance was established in 2009. About 260 organizations in 26 stakeholder categories are working together to help transform from the residential and small commercial HVAC industry to ensure that technology, equipment, installation and maintenance are of the highest quality to promote energy efficiency and peak load reduction. In this role the WHPA provides input to California Investor-Owned Utilities. For more information, contact info@performancealliance.org.
